Bridging *rigorous epidemiological science* with *institutional health financing* — delivering publication-ready research, doctoral-level biostatistics, and competitive, donor-aligned grant applications for scholars, researchers, NGOs, and public health organizations across Pakistan and globally.

1 Who We Are

Nebula Research & Development is the trading name of **NEBULA R&D (SMC-PRIVATE) LIMITED**, incorporated with the SECP in December 2024 (Inc. No. 0278690) and registered with the FBR (F746175). It is a specialized public health and biostatistics consultancy delivering scientific writing support, statistical analysis, grant development, and institutional capacity support. Operating across two focused divisions, Nebula R&D partners with postgraduate scholars, academic researchers, NGOs, government health programs, and international health organizations — bringing doctoral-calibre rigor and donor-aligned strategic thinking to every engagement.

Our team is led by an MBBS-qualified clinician-epidemiologist with advanced postgraduate training in Field Epidemiology & Biostatistics, FELTP fellowship, international peer-review credentials (PLOS ONE), and over 75 editions of co-editorship of a national Public Health Bulletin — supported by a de-identified, multi-disciplinary associate network spanning GIS, data science, global health financing, and MEAL.

2 Mission & Vision

MISSION

Translate Science into Impact

To bridge the gap between rigorous field research and policy-relevant, publication-ready, and donor-fundable outputs — delivering analytical excellence at every stage of the research and grant lifecycle.

VISION

A Stronger Public Health Evidence Base

To be the most trusted independent research and grant advisory practice in South Asia, recognized for uncompromising scientific integrity, international reporting standards, and transformative outcomes for clients.

3 Our Two Divisions

I Academic & Q1 Publications

For scholars, researchers & postgraduates

- Biostatistics & Data Analytics (R, Python, SPSS, QGIS)
- Synopsis & IRB / ERC Ethical Protocol
- Thesis & Dissertation Research Support (MD / MS / FCPS · MSPH / MPH · PhD)
- Q1 Publication-Ready Manuscripts (IMRaD, STROBE, PRISMA, CONSORT)
- Peer-Review Rebuttal Dossiers

II Grants, RFQs & MEAL Frameworks

For NGOs, health consultancies & government units

- MEAL Framework & LogFrame Matrix Design
- Financial Proposal & Activity-Based Costing
- RFQ / RFP Technical Bid Package
- Tailored Donor Grant Applications (WHO, UNICEF, Gavi, Global Fund, FCDO)
- Baseline / Endline Evaluation Design

5 Our Operating Principles

Scientific & Academic Integrity
Every deliverable follows international reporting standards (STROBE, PRISMA, CONSORT, CHEERS) and is quality-reviewed before release. Clients remain the authors of their work; our support is disclosed per institutional and ICMJE policy.

Strict Confidentiality
All client data, datasets, and manuscripts are protected under a binding NDA. Raw data is purged within 14 days of project completion.

Full IP Transfer
100% of intellectual property rights transfer unconditionally to the client upon receipt of full payment — no exceptions.

Deadline Accountability
Agreed delivery timelines are contractually binding. Late delivery credits of 2.5%/week apply; rush delivery available within 72 hours.

Donor-Standard Quality
Division II outputs are benchmarked against WHO, UNICEF, Gavi, and Global Fund scoring rubrics — compliance matrices included on every bid.

Transparent Pricing
Fixed-fee quotations issued before commencement. Surcharges (rush, data cleaning) communicated in writing and agreed before work begins.
